- **Cleaner Appearance**

100% Recyclable

Angleboard products are made from 100% recycled materials and are 100% recyclable.

Angleboard

We've got all the angles covered.

Angleboard AngleWrap

100% Recyclable

Angleboard products are made from 100% recycled materials and are 100% recyclable.

Stronger • No Paper Cuts • No Delamination

AngleWrap® is made of multiple plies of recycled paper, laminated together with glue and encased in a full outer wrap of paper. The board is then formed into a rigid right angle. AngleWrap:

- Reduces the packaging cost-per-load
- Increases strength
- Is safer to handle
- Provides a clean, crisp appearance for POP displays
- Is an excellent replacement for wood packaging
- Permits higher strap tension for tighter, more secure loads
- Prevents paper cuts and delamination

Special surface finishes are available, including moisture-resistant and abrasion-resistant coatings. One and two-color printing is also available for branding, product identification and instructional purposes.
