BEL 180 FLEXIBILITY OR EFFICIENCY ON DEMAND

The BEL 180 can be set to random or semi-automatic depending on the changing demands of your packaging line.

Adaptive Case Sealing for Uniform or Random Case Sizes

The BEL 180 is a semi-automatic, random and uniform tape case sealer. The machine is able to adjust to the width and height of the inserted case and features locking movements for safety in case of sudden air loss. The BEL 180's ability to lock into position with the push of a button for uniform sealing also makes this machine very convenient and adaptable to fluctuations in product demand.

The BEL 180 also comes standard with a DEKKA tape head with tilt-out tape head function for easy and quick tape roll changes. Also, with dual side belts the machine grips the case tightly for a consistent and square seal.
